

Ham 02 - Intro class agenda

Dr. Marc & Rosemary © 241220

1. Material for students

Ham 1 – Ham Technician Study Guide Questions Pool

Ham 2 - Agenda handout

Ham 3, 4

Ham 6, 7, 8, 9

2. Welcome

Your time is valuable. So, this session will be about 2 hours.

Then you can go work at your own pace, with a definite end-time for review.

You can do this. You will see why I know that.

3. Introduce authors and Elmers

Rosemary, KE5CMS mostly called Gramm, totally non-math, but very smart and intuitive. Evaluates my material.

Dr. Marc, NM0D, retired TU professor, both Commercial and Ham Extra Class licenses, Elmer for over 500 hams

Lt.Col. Dan, K5CAY, retired USAF pilot, Ham Extra Class, VE expert, nets, and digital communications guru.

Ashley Talton, KI5TBB, in first class, now Amateur Extra license, class instructor.

Depending on the week, other Elmers volunteer to help you.

4. Tell us about you. Name?

What do you know about ham radio?

What got you interested or what do you want to do with it?

5. Transfer material

Make sure everyone is checked-in.

Get their email address. That is how you get material.

Send files.

Make sure they received and open first one, Ham 2 - Agenda.

6. Ham 2 - Agenda

Ham 3 - What is Ham

Ham 4 - Differences, show Handi, from \$26.30 on Amazon to as much as you want to spend.

Break

Ham Technician Study Guide

TOC

What Is This

SubElement T1 & T2 go over to illustrate

7. Study process

- Read BOLD question

- Study HIGHLIGHT correct answer

- Analyze ITALIC hint: question = answer

8. That is all.

Stay positive. Ignore distractor answers and anything else about the question, such as numbers and references.

It is as simple as 1,2,3.

Repeat for all the questions.

9. Other references for next session.

Ham 6 – Electric principles

Ham 7 – Moving zeroes

Ham 8 – You can do it.

10. Follow-up

We will see you in two-weeks. Same Bat-time, same Bat-channel.

During study, write down questions, qualms, and not sure abouts. Bring them.

An old professor once said, “If you do not understand, likely someone else does not either. So, help them out.”

By going over everyone’s questions, you will grasp a new perspective.

11. Ham 9 - Schedule to take the exam

Goal is 4 - 5 weeks for optimal capture of your memory. If you delay, more time is required to refresh.

You can do it. All my students who persevered have passed.

A month and done. Cool! Very cool!
